how did the north european states react to the terrorist attacks in the united states on september 11 2001 michael karlsson argues that 9 11 led to a considerable pressure to strengthen rules and practices for counterterrorism and security but that this pressure was mediated by several other conditions the reforms were also affected by among other things how the threat of global terrorism was perceived pressure from international institutions such as the un eu and nato the domestic political context and pre existing rules and practices his analysis uses the new institutionalism framework tested through case studies of denmark sweden finland estonia latvia and lithuania the book offers a unique lens on the study of counterterrorism from a new theoretical and regional perspective

the relationship between translation and conflict is highly relevant in today s globalised and fragmented world and this is attracting increased academic interest this collection of essays was inspired by the first international conference to directly address the translator and interpreter s involvement in situations of military and ideological conflict and its representation in fiction the collection adopts an interdisciplinary approach and the contributors to the volume bring to bear a variety of perspectives informed by media studies historiography literary scholarship and self reflective interpreting and translation practice the reader is presented with compelling case studies of the embeddedness of translators and interpreters either on the ground or as portrayed in fiction and of their roles in mediating memorizing or rewriting conflict

state society dialogue in saudi arabia is one of the most contested issues in the country today yet little is known about the national dialogue process and its relationship with saudi society is frequently and widely misunderstood the first to examine the saudi arabian national dialogue process in its entirety mark c thompson investigates the relationship between the king abdulaziz center for national dialogue kacnd and the key social constituencies of saudi society since its establishment in 2003 the kacnd has attempted to promote a culture of dialogue and has

encouraged the debate of contentious socio political issues by bringing individuals together from across the kingdom drawing on antonio gramsci s theory of hegemony the author asks whether the saudi socio political system is moving from a form of patrimonial state to one of ideological hegemony and if this is the case whether the kacnd is a catalyst or even a driving force in this transition saudi arabia and the path to political change investigates the practices and the impact of the kacnd and assesses the extent to which the institution s activities and the ongoing national dialogue process represent a viable attempt to address emerging political concerns in saudi arabia covering pivotal issues including women s empowerment public health and employment the author here explores the extensive impact of the kacnd s activities on internal cross constituency communication and discourse and shows how the process relates to wider regime strategies and to the evolution of the saudi polity based on approximately 120 interviews conducted in saudi arabia from 2009 to 2011 and drawing on the evidence of a wide range of focus groups and interviews with national dialogue participants kacnd officials government ministers lawyers and journalists this book provides a unique insight into the effects and consequences of saudi national dialogue and questions the extent to which wider ideological debate is possible in the kingdom

it is clear by now that the label arab spring has proven too simplistic to describe the uprisings that upended the political order of the arab world in late 2010 brutal crackdowns and civil conflict in syria libya and yemen dashed the hopes that peaceful democratic revolutions would sweep the region in other countries the departure of authoritarian leaders led to many false starts without producing democratic conclusions societies that had appeared united in opposition suddenly seemed fractious youth were once again banished to the political margins reconstructing the middle east examines the changes that happened within the region from 2010 and the long term challenges and opportunities they present featuring the work of authors with a diversity of perspectives most of whom hail from the region it addresses key issues of political economic and societal changes the role of young people and of the international community in addition the book deals with the questions of both political and economic reform and the intertwined nature of the two political reform that allows greater participation will fail to quell frustration if arabs continue to feel that their job prospects are bleak similarly arabs will not accept economic reform that restores growth but continues to fence off the political sphere this book offers a unique perspective on the uprisings by focusing on specific issue areas where change is needed and offering a roadmap for the long road towards state building and new social contracts based on political inclusion respect for pluralism and sustained economic growth as such it will be a valuable resource for students and scholars of middle east politics as well as those with an interest in the arab spring

although they are one of the most powerful military forces in latin american history little is known about the revolutionary armed forces of colombia people s army farc ep this book explains why this political military movement came into existence and assesses whether the methods employed by the insurgency have the potential to free those marginalised in colombia by evaluating the farc ep s actions ideological construction and their theoretical placement the book gauges how this guerrilla movement relates to revolutionary theory and practice and through what tangible mechanisms if any they are creating a new colombia

the undeclared war in the middle east is the abiding conflict of our era with little apparent hope of resolution despite years of peace talks on one side of the conflict in the face of suicide bombings and international criticism over its military aggression israel asserts the right of the jewish state to exist in palestine on the other the palestinian people struggle some peacefully some violently for survival far beyond israel s disputed borders in new york and washington london and paris sydney and melbourne the conflict is replayed in passionate public debate by holocaust survivors zionist organisations arab advocates the anti war movement newspaper columnists presidents and prime ministers and politicians and activists of all shades in my israel question a young australian jew antony loewenstein asks how much zionism the ideology of jewish nationalism is to blame for this intractable conflict he fearlessly investigates the ways in which the jewish diaspora in australia and elsewhere have campaigned on israel s behalf in the media and in political and business spheres he also considers the historical rationale for zionis including the centuries of virulent european antisemitism from which it grew and asks how relevant and sustainable twentieth century zionism is today a searching discussion from a significant new voice in one of the most important debates of our times

many of tony blair s policy decisions in the israeli palestinian arena were controversial and politically costly blair labour and palestine argues that gaps between him and much of his party were rooted in different world views a positive attitude towards israel came to be seen as a defining mark of new labour loyalists however contrasting views among left leaning strands in the party reflected a broader set of ideological rifts such differences became increasingly significant in the wake of 9 11 as british policymakers sought to understand and respond to islamic anger against the west based on interviews conducted by the author and on previously unseen documents this unique case study shows how the distinctive world view of a political leader defined foreign policy by shaping britain s response to islamist violence and its interconnected approach to the israeli palestinian conflict author toby greene also examines the extent to which ministers and officials considered shifting foreign policy in response to

fears of islamist radicalisation in the uk and blair s role in stopping this trend especially after the 7 7 bombings

green australia a snapshot examines the ways in which australians are attempting to reduce their ecological footprint both at home and at work in 2009 the co2 energy emissions index found that australia had overtaken the usa to become the largest per capita emitter of greenhouse gases in the world a legacy of dependence on coal fired power stations the widespread adoption of conventional farming techniques heavy reliance on vehicles powered by fossil fuel dirty industrial practices and a growing mountain of waste yet in recent years there has been a growing awareness that climate change is beginning to bite the recent drought and devastating floods suggesting that more extreme weather patterns are likely unless significant steps are taken to combat global warming using case studies and up to date research this book demonstrates that although much more needs to be done if australia is to secure a carbon neutral future some green shoots are beginning to emerge

ten years ago the great new wilderness debate began a cross disciplinary conversation about the varied constructions of wilderness and the controversies that surround them the wilderness debate rages on will reinvigorate that conversation and usher in a second decade of debate like its predecessor the book gathers both critiques and defenses of the idea of wilderness from a wide variety of perspectives and voices the wilderness debate rages on includes the best explorations of the concept of the concept of wilderness from the past decade underappreciated essays from the early twentieth century that offer an alternative vision of the concept and importance of wilderness and writings meant to clarify or help us rethink the concept of wilderness narrative

writers such as wendell berry scott russell sanders marilynne robinson kathleen dean moore and lynn maria litala are also given a voice in order to show how the wilderness debate is expanding outside the academy the writers represented in the anthology include ecologists environmental philosophers conservation biologists cultural geographers and environmental activists the book begins with little known papers by early twentieth century ecologists advocating the preservation of natural areas for scientific study not as did thoreau muir and the early leopold for purposes of outdoor recreation the editors argue that had these writers influenced the eventual development of federal wilderness policy our national wilderness system would better serve contemporary conservation priorities for representative ecosystems and biodiversity
